

ABSTRACT

The method of producing a malt alcohol beverage according to this invention is characterized in that in the production of the malt alcohol beverage an adsorbent is used to remove through adsorption at least a part of rough flavor components from malt, a malt alcohol beverage intermediate product, or the malt alcohol beverage.

Such method of producing a malt alcohol beverage enables to provide a method of producing a malt alcohol beverage such that the aging of flavor after production can be suppressed and the flavor immediately after production can be maintained over a prolonged period of time.
